Career Objective To seek a position in a front-end development or UI/UX related area in your organisation where I can contribute my talent and grow along.

Skills

Tools: Adobe XD, Adobe illustrator, Photoshop, CorelDRAW, InDesign, Arduino, Wordpress, Figma

Technologies: HTML5, CSS3, ECMAScript6, React, Restful api, SQL, Python, C#, Git

Experience

SPACE Shopping Guide Website **2020.5 — Current**

- A React-based shopping guide website, using PHP as backend to help Australian customers to preview products in the store and make shopping plans.
- Related technologies: JWT(JSON Web Token), React, PHP, PWA (Progressive Web Apps), Restful api, etc.
- I played as a front-end developer in the team and I am mainly responsible for building the main interface and interaction effects of the website.

Xero Payroll Website **2019.2 — Current**

- A React-based Payroll website, using AWS as backend.
- The development progress management is depend on Jira and Jenkins, and the main technologies involved are React, AWS, Git and GraphQL.
- I mainly play a role as UX designer and front-end developer. I made the prototype and did some user tests for this website and built the interface with React.

Web Information System Project **2020.2 — 2020.6**

- Using React as front-end development tool and native php as backend building a simple video website similar to YouTube.
- Users can login & Signup their account, upload videos, add comment, give thumb up under videos and add video to collection page.

Genbukan Karate Website (<https://genbukankarate.com/>) **2019.12—2020.1**

- Using React Js as frontend and firebase as backend building an official website for advertising and recruiting members.
- The core functions of this website are signup & sign in, user zone and message board.
- Making Prototypes and conducting user tests, developing website with React & Firebase, maintaining the website including update information, optimised this website for SEO, fix issues about email setting and so on.

Mind Initiative

2019.7—2019.11

- Mind Initiative is a psychotherapy website project using React to build front-end interface and AWS as back-end.
- The core functions of this website are Login & Signup, making appointment on calendar, graphical display of mental health data.
- I played as scrum master and web developer. My main task is to reply to customer emails and schedule the work progress for the team and build the website with React.

Design Computing Studio 1 - Interactive Technology Project

2019.7—2019.11

- A game website called 'Space Traveller' based on Vanilla JavaScript, HTML & CSS. User can use space button to control the spaceship to avoid the obstacles.
- Related technologies: canvas, Ajax
- The core functions of this website are game window, gallery information with calling old photo of QLD data through the api of the State Library of Queensland.
